

SchoolTech

Excellence in school-based Vocational Education and Training for Year 11 and 12

Real Stories

Real Achievements

Vincent's Story | Construction

Choosing a career was easy for me because I always loved making and fixing things, especially with wood.

I chose the SchoolTech program after attending an information night at the end of Year 10 and decided that this was the right course for me.

I enjoyed being treated as an adult, the school work was presented in a language that I could understand, and the practical side of the course gave me extra confidence in my abilities. I did my work experience days with a local company and they took me on as an apprentice at the end of Year 12.

Whilst working in my carpentry/construction apprenticeship, I have worked on many different job sites – medical centres, schools and luxury houses and you certainly don't go to work and do the same thing every day.

"I would definitely recommend the SchoolTech program to Year 10 students who have a trade career in mind."
